(*c*) About R. L. 3,140'00 near Ranaghatta and R. L. 2,850'00 near Halebid.

(*d*) Excepting the wing wall and a portion of masonry where sluice vent is provided for, the rest of the portion, *i.e.*, body wall proper of the *anecut*, has been completely washed off.

(*e*) and (*f*) The cost of repairs and restoration of the *anecut* and the *nala* would be prohibitively costly, as it involves an average cut of 84 feet for a distance of 6 miles. No regular estimate is got up.

(*g*) and (*h*) The scheme is not feasible on account of the prohibitive cost of the project and the inadequate supply of water in the river, as there is already the New Kudlur *anecut* higher up, recently constructed at a cost of Rs. 2 lakhs.
